

TECHNICAL MANUAL

ILLUSTRATED PARTS BREAKDOWN

AIRCRAFT ENGINES

MODELS O-470-13, O-470-13A, O-470-4

(CONTINENTAL MOTORS)
N00600-76-D-0596

Each transmittal of this document outside of the Department of Defense
must have approval of the issuing Service.

BASIC AND ALL CHANGES HAVE BEEN COLLATED
TO MAKE THIS A COMPLETE PUBLICATION.

Published by direction of Commander, Naval Air Systems Command.

REPRINT

15 NOVEMBER 1956

Change 5 - 15 December 1976

Reproduction for non-military use of the information or illustrations contained in this publication is not permitted. The policy for military use reproduction is established for the Army in AR 380-5, for the Navy and Marine Corps in OPNAVINST 5510.1B, and for the Air Force in Air Force Regulation 206-1.

LIST OF EFFECTIVE PAGES

Insert latest changed pages; dispose of superseded pages in accordance with applicable regulations.

NOTE: On a changed page, the portion of the text affected by the latest change is indicated by a vertical line, or other change symbol, in the outer margin of the page. Changes to illustrations are indicated by miniature pointing hands. Changes to wiring diagrams are indicated by shaded areas.

Dates of issue for original and changed pages are:

Original 0..... 15 Nov 56	Change 1..... 15 Nov 57	Change..... 2..... 1 Dec 57
Change..... 3..... 15 Dec 57	Change..... 4..... 1 Dec 58	Change..... 5..... 15 Dec 76

Total number of pages in this manual is 40 consisting of the following:

Page No.	# Change No.	Page No.	# Change No.	Page No.	# Change No.
Title	5	5 - 6	5	20 - 24	5
A	5	7 - 9 Deleted	5	25	1
i	5	10	5	26	3
ii Blank	5	11 - 12	0	27	0
1 - 2A	1	13	1	28	1
2B Blank.....	1	14 - 19	0	29	0
3 - 4	1			30 - 33	5

* Zero in this column indicates an original page.

III	NUMERICAL INDEX	30

This manual was prepared under the technical cognizance of Naval Air Rework Facility, Pensacola, Florida. Comments and recommendations pertaining to this manual shall be submitted in accordance with The Naval Aviation Maintenance Program (NAMP) OPNAVINST 4790.2A.

SECTION I INTRODUCTION

1. SCOPE. This catalog lists and describes the parts and contractor furnished equipment of Models O-470-13, O-470-13A and O-470-4 Aircraft Engines manufactured by Continental Motors Corporation, Muskegon, Michigan.

2. ARRANGEMENT OF ILLUSTRATED PARTS BREAKDOWN.

a. The Table of Contents at the front of the catalog shows the method of grouping all parts and the sequence of groups along with their respective page numbers.

b. Section II, the Group Assembly Parts List, is a parts listing of the complete engine divided into 14 main groups as shown in the Table of Contents. Each assembly listed is followed immediately by its component parts properly indented, thereunder, to show their relationship to the assembly. Component parts of the complete engine which are not included in any assembly, but which are used in conjunction with, attach, or attach to a certain assembly, are listed either preceding the first detail or following the last detail of that assembly, and in line with the major assembly.

c. Section III, the Numerical Index, is a list of all part numbers shown in the Group Assembly Parts List and is compiled in accordance with the numerical part number filing system described below:

1. Part number numerical arrangement starts on the left-hand column and continues from left to right, one column at a time, until part number numerical arrangement is determined.

2. The order of precedence in part number numerical arrangement is as follows:

First position arrangement

- (1) Letters A through Z
- (2) Numerals 0 through 9

Second and succeeding position arrangement

- (1) Space (blank column)
- (2) Dash (-)
- (3) Letters A through Z
- (4) Numerals 0 through 9

Note: Alphabetical O's are considered as zeros.

3. USE OF ILLUSTRATED PARTS BREAKDOWN.

a. When the part number is known and it is desired to learn the appearance of the part, refer to the Numerical Index for the figure and index number for that part. Turn back to the proper figure in the Group Assembly Parts List and find the index number on the illustration which will locate the part and show its appearance. The corresponding index number in the parts list will give the correct nomenclature of the part.

b. When the part number is not known and it is desired to find the part, refer to the Table of Contents for the page number of the illustration showing the assembly that contains the part in question. Then

refer to the illustration and locate the part by observation. Its corresponding index number in the parts list will give the correct nomenclature of the part.

c. The quantities listed in the "UNITS PER ASSY" column of the Group Assembly Parts List are, in the case of assemblies, the total quantity used per engine at the location indicated, while the component parts indented under the assemblies are the quantity used per assembly. The quantities specified, therefore, are not necessarily the total used per engine. Refer to the Numerical Index for the total quantities used per engine.

d. Non-procurable parts are indicated as "NP" in the "UNITS PER ASSY" column. To obtain non-procurable parts, order the next higher assembly as indicated in the Group Assembly Parts List. Non-procurable assemblies appearing in column 1 of the "DESCRIPTION" column are established for the convenience of the list user and may not be ordered as such.

4. VENDORS' CODE SYMBOLS. Standard code symbols, placed in parenthesis after the description, are used to designate the manufacturer of purchased items of equipment. These symbols are as follows:

VENDORS' CODE SYMBOLS

Symbol	Vendors' Name and Address
ACS	AC Spark Plug Division General Motors Corp Flint, Mich.
AF	Heli-Coil Corp Danbury, Conn.
BG	B G Corp New York, N.Y.
BPD	Bendix Products Division Bendix Aviation Corp South Bend, Ind.
CK	Champion Spark Plug Co Toledo, Ohio
ELA	Electric Auto-Lite Co Toledo, Ohio
NM	National Motor Bearing Co Inc Redwood City, California
SNT	Scintilla Magneto Division Bendix Aviation Corp Sidney, N.Y.
UC	United-Carr Fastener Corp Cambridge, Mass.

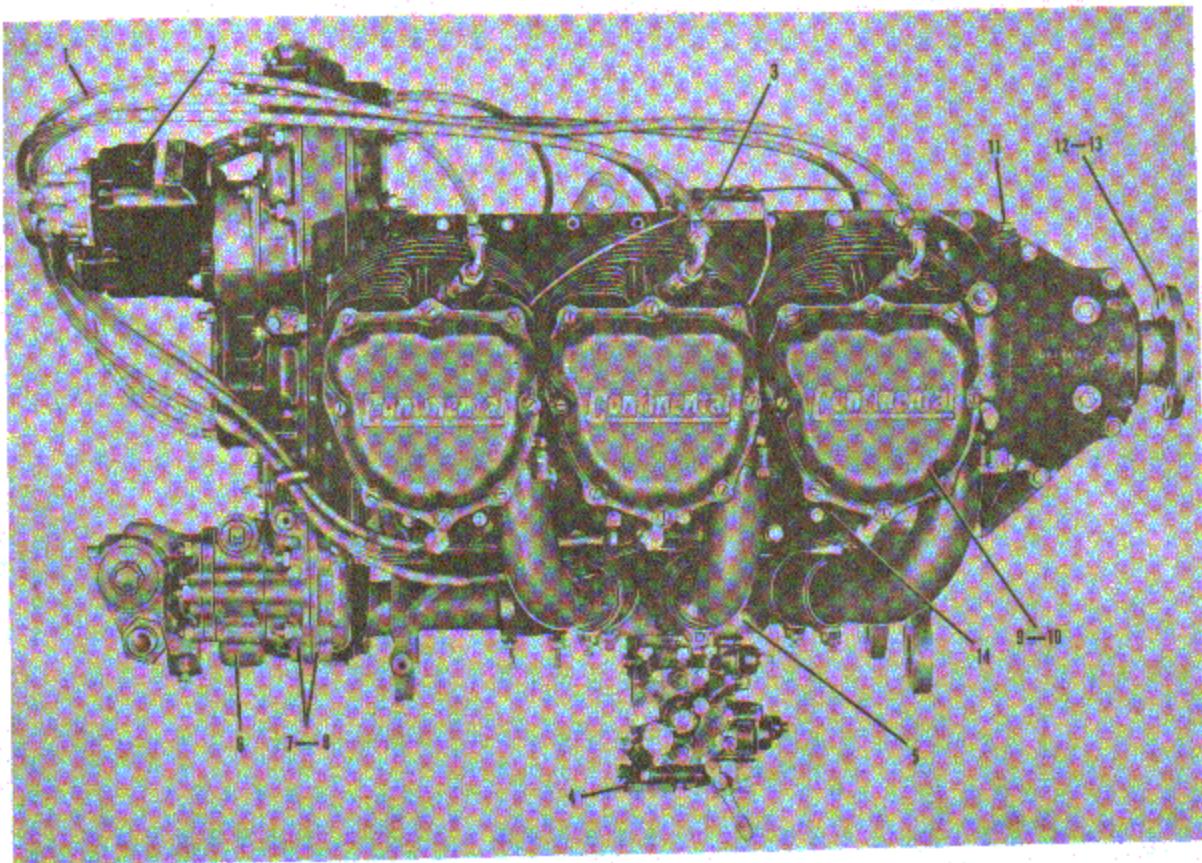

Figure 1. Right Side View Typical of Type O-470-13 and O-470-13A Aircraft Engines (1 of 2)

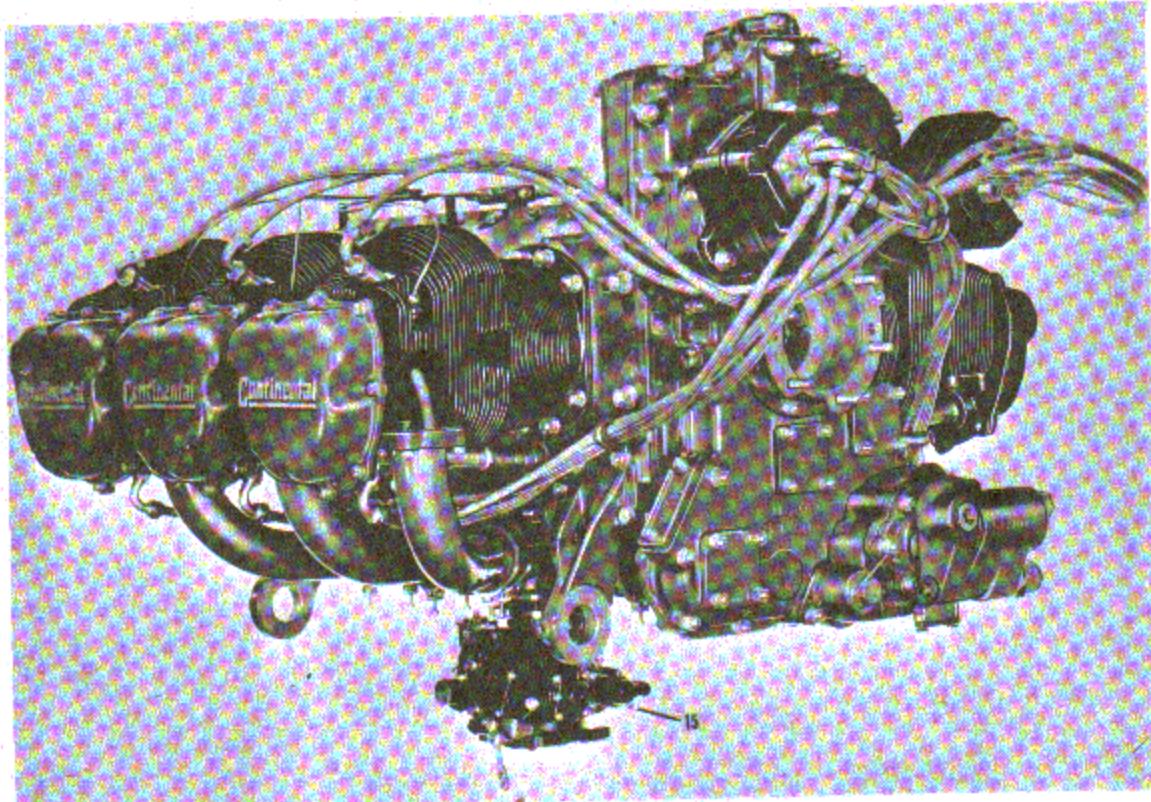

Figure 1. Three Quarter Left Rear View of Type O-470-4 Aircraft Engine (2 of 2)

Legend for Figure 1

INDEX NO.	GROUP DESIGNATION	FIGURE NO.

10	Complete Piston Assembly	11
11	Crankcase Assembly	12
13	Complete Crankshaft Assembly	14
14	Camshaft and Lifters Assembly	15
15	Carburetor Assembly	5A

VENDORS' CODE SYMBOLS (Cont.)

Symbol	Vendors' Name and Address
VM	Victor Mfg and Gasket Co Chicago, Ill.
WCX	Wilcox-Rich Division Eaton Mfg Co Detroit, Mich.
WIT	Wittek Mfg Co Chicago, Ill.
WKI	Waldes-Kohinoor Inc Long Island City, N.Y.

5. USABLE ON CODE. Part variations between the engine models are indicated by a letter symbol, or combination of letter symbols in the "Usable on Code" column. The following tabulation explains the code letter symbols used in this catalog:

LETTER CODE	ENGINE MODEL	SERIAL NO.
a	O-470-13	
b	O-470-13A	
c	O-470-4	
d	O-470-13A	105661
e	O-470-4	116164

Where the "Usable on Code" column has been left blank, the part is usable on each engine.

6. SOURCE CODING. The following is a list of definitions as applied to the Numerical Index "SOURCE CODE" column.

(a) CODE "P" - PARTS UNDER INVENTORY STOCK CONTROL

- (1) CODE "P" is applied to parts which are procured in view of relatively high usage. Code "P" parts may be requisitioned and installed by any maintenance level, unless followed by the letter - "O", which restricts requisition and replacement to Depot (O&R) level only. Restricted service manufacture is considered practicable but only after an attempt has been made to procure from Supply Sources. In lieu of Procurement of "P" Coded parts, the Department may designate a Depot (O&R) level activity to manufacture supply requirements for the Program.
- (2) CODE "P1" is applied to parts which are very difficult or uneconomical to manufacture. Service manufacture is considered impracticable. Code "P1" parts may be requisitioned and installed by any maintenance level, unless followed by the letter - "O" which restricts requisition and replacement to Depot (O&R) level only.

(b) CODE "M" MANUFACTURE, PARTS NOT PROCURED

- (1) CODE "M" is applied to parts which are within the facilities of any activity to manufacture. Procurement and stocking are not justified in view of the relatively low usage, or storage and installation factors, of these parts. Needs are to be met by local manufacture as required.
- (2) CODE "M1" is applied to parts which can be manufactured only by utilizing the facilities of the Depot (O&R) activity. Procurement and stocking of these parts are not justified in view of their relatively low usage and installation factors. The

- needs of all activities are to be met through salvage, or by Depot (O&R) level manufacture.
- (c) CODE "A" ASSEMBLE—ASSEMBLY NOT PROCURED
- (1) CODE "A" is applied to assemblies made up of two or more units each of which carry individual part numbers and description, and which may be assembled by any Maintenance level.
 - (2) CODE "A1" is applied to assemblies made up of two or more parts each of which carry individual part numbers and description, and which may be assembled only by activities having Depot (O&R) facilities.
- (d) CODE "X" PARTS CONSIDERED IMPRACTICABLE FOR MANUFACTURE OR PROCUREMENT
- (1) CODE "X" is applied to Main Structural Members or similar parts which, if required, would suggest extensive aircraft or equipment reconditioning. The need of a part, or parts, coded "X" (wing spar caps, center section structure) should normally result in a recommendation to retire the aircraft or equipment from service.
 - (2) CODE "X1" is applied to parts for which procurement of the next larger assembly is justified; e.g., an integral detail part, such as welded segments, inseparable from its assembly; a part machined in a matched set; or a part of an assembly which, if required, would suggest extensive reconditioning of each assembly.
- (3) CODE "X2" is applied to parts which are neither procured nor stocked. Activities requiring such parts shall attempt to obtain from salvage; if not obtainable from salvage, such parts shall be requisitioned through normal supply channels with supporting justification.
- (e) CODE * PARTS NOT PROCURED, MANUFACTURED OR STOCKED
- (1) CODE * applies to installation drawings, diagrams, instructions or field service drawings, basic drawing numbers which cannot be procured or manufactured and obsolete parts.

7. ABBREVIATIONS. The following abbreviations are used in this catalog:

AR	Used as Required
Assy	Assembly
dia	diameter
Fig.	Figure
ID	Inside Diameter
in.	inch(es)
lg	long
No.	Number(s)
NP	Non-Procurable
OD	Outside Diameter
Opt.	Optional
OS	Oversize
Ref.	Reference (same part identified in referenced figure or same kind indicated by same index number elsewhere on same figure).
